

Launch of a pilot joint monitoring system in the framework of project entitled “Joint Water REsources management System for Long-term Efficiency” with acronym “WRESTLE”

Municipal Enterprise for Water and Sewerage of Alexandroupoli (DEYAA) is the Lead Beneficiary of project entitled “Joint Water REsources management System for Long-term Efficiency” with acronym “WRESTLE”, which is cooperation between Greece and Bulgaria. The partnership consists of Central Union of Municipalities in Greece (KEDE), Democritus University of Thrace (DUTH), Municipality of Xanthi, Municipal Enterprise for Water and Sewerage of Xanthi (DEYAX), the NGO “SWPIC” and Municipality of Kresna.

Within the framework of the project, a joint monitoring system has been designed in order to sustainably manage the available water resources in the cross-border area. The pilot innovative system operates since September 2021 and no problems have occurred so far. It is closely monitored by representatives of DEYAA, following the training session which was conducted by an external expert on Friday, 1st October. During the training the way in which the system functions was described by both water companies and the end users.

Joint Water Resources Management System for Long-term Efficiency - WRESTLE
In the framework of the implementation of the "INTERREG V-A Greece - Bulgaria 2014-2020" Cooperation Program
